SUBJECT INDEX

| | | | | | |
|--|---|--|--|---|---|
| Addition agent, gelatine, Zn-Fe-Ni alloy plating, acid citrate bath | 157 | Copper electroless/immersion deposition, ionic liquid | 196 | Hull cell studies | 122, 172 |
| Adhesion testing | 162 | Copper plating, pcbs, new technology | 293 | Hull cell studies, rde electrode | 315 |
| AGM Minutes | 9 | Corrosion resistance, Cr(VI) composite plating | 308 | Induced codeposition, alloy plating, Ni-W alloys | 92 |
| Alloy plating | 92, 98, 103, 122, 141, 153, 157, 196, 211, 301, 315 | Corrosion resistance, molybdate conversion coatings, zinc surfaces | 251 | Infrared spectroelectrochemistry | 41 |
| Aluminium anodising | 51 | Corrosion resistance, phosphate-yttria coating | 167 | Infrared spectroscopy | 55 |
| Aluminium electrodeposition, ionic liquid [Py _{1,4}]TfSA/AlCl ₃ | 220 | Corrosion resistance, Zn-Co electrodeposits | 141 | Ionic liquid electrodeposition | 177, 179, 182, 183, 189, 196, 205, 211, 220, 227, 234 |
| Aluminium electrodeposition, ionic liquid | 196 | Cross-linked organic coatings, blocked isocyanates | 75 | Ionic liquid plating, industrial opportunities, challenges | 183 |
| Aluminium electrodeposition, ionic liquid, EMIC/AlCl ₃ | 227 | Cyclic voltammetry | 115, 148, 205, 220, 234, 326 | Ionic liquids, eutectic based, electrodeposition | 196, 211, 234 |
| Aluminium electroplated Mg alloy, ionic liquid | 227 | DC reactive magnetron sputtering | 62 | Laser Raman spectroscopy | 62 |
| Anodic film porosity | 51 | Editorial | 1, 73, 177, 241, 289 | Letters | 241 |
| Anodic films, nanostructure | 51 | Electrical resistivity, TiN films | 62 | Levellers, Cu electrodeposition | 41 |
| Anodising | 51, 109 | Electrochemical impedance spectroscopy | 55, 141, 167, 227, 275, 280, 308 | Linear sweep voltammetry | 148, 315 |
| Anomalous electrodeposition, Sn-Cu alloy | 315 | Electrochemical particle fabrication, copper | 267 | Magnesium electrodeposition, ionic liquid | 196 |
| Atmospheric pressure plasma liquid deposition | 136 | Electrochemical polarisation studies | 167 | Magneto-electropolishing, Nitinol | 280 |
| Atomic absorption spectroscopy | 153, 157 | Electrocrystallisation, J. A. V. Butler | 134 | Mass transport characteristics, Sn electrodeposition | 148 |
| Atomic force microscopy | 103, 141, 153, 234, 280 | Electrodeposited pigments, anodic films | 109 | Multilayer deposition | 34 |
| Atomic force microscopy, molecular imaging | 62 | Electrodeposition | 19, 34, 41, 82, 83, 87, 92, 98, 103, 115, 122, 141, 148, 153, 157, 172, 183, 196, 205, 211, 220, 227, 234, 249, 260, 267, 275, 293, 301, 308, 315, 337 | Multilayer electrodeposition, Ni-Co-Cu, magnetoresistance | 260 |
| Atomic force microscopy, tapping mode | 19 | Electrodissolution (electropolishing), ionic liquids | 196 | Nickel electrodeposition, acetate bath, Hull cell studies | 172 |
| Attenuated total reflection | 41 | Electroless deposition, copper | 29 | Nickel electrodeposition, ionic liquid, choline chloride/NiCl ₂ | 234 |
| Fourier transform infrared spectroscopy | 55, 280 | Electroless/immersion deposition, ionic liquids | 196 | Ni-Co-Cu multilayer electrodeposition, pulsed current, citrate bath | 260 |
| Auger electron spectroscopy | 55, 280 | Electrolytic recovery | 66 | Normal electrodeposition, Sn-Cu alloy | 315 |
| Biographies | 134, 248 | Electroreflectance spectroscopy | 267 | Nyquist diagrams | 167, 227 |
| Bismuth sulphide coatings, electrochemical reduction, Ni ²⁺ ions | 326 | Energy dispersive X-ray analysis | 109, 315 | Obituary – E C Kedward | 7 |
| Bis-sulphur silane | 55 | Energy dispersive X-ray diffraction | 205 | Obituary – T. Bell | 182 |
| Blocking agent characteristics | 75 | Energy dispersive X-ray spectroscopy | 211, 227 | Organic coatings | 75 |
| Blocking agents | 75 | Epoxy functional silane | 55 | Palladium electrodeposition, nanoscaled, hydrophobic ionic liquid (BMPTFSI) | 205 |
| Book reviews | 79, 131, 182 | European funding opportunities, finishing research | 193 | PCB plating technology | 293 |
| Brighteners, ionic liquid electrodeposition | 234 | Exhibition report – Surface World 2007 | 6 | Perfluorinated cationic surfactant, Sn-Cu deposition | 315 |
| Chromium electrodeposition, composites, SiC, WC, sulphate bath | 308 | Field emission gun scanning electron microscopy | 51 | Phosphating, yttria additive | 165 |
| Chromium electrodeposition, ionic liquid | 196 | Fracture surface, magneto-electropolished Nitinol, bend test | 280 | Photoelectrochemically prepared nanostructured Si surfaces | 19 |
| Chronocoulometry, Ni electrodeposition, ionic liquid | 234 | Friction | 136 | Physical vapour deposition | 62, 136 |
| Cobalt-tungsten alloy electrodeposition, tribology, sulphate-tungstate bath | 671 | Giant magnetoresistance, electrodeposited Ni-Co(Cu)/Cu multilayers | 260 | Pilling-Bedworth ratio | 51 |
| Complex plane impedance studies, Ag deposition | 275 | Gravimetry | 92 | Plasma enhanced chemical vapour deposition | 136 |
| Composite plating, Cr(VI)-SiC + WC, corrosion resistance | 308 | Hardness, Co-W electroplates | 301 | Polarisation studies, Zn-Mn alloy deposition | 153 |
| Conducting polymer coatings, electrodeposited, applications | 34 | Hardness, pulse plated Sn, alkaline stannate bath | 115 | Polyaniline coatings | 34 |
| Conducting polymer coatings, electrodeposition | 34 | Hardness, sol dip yttria doped zirconia coating | 162 | Polypyrrole coatings | 34 |
| Conference report – aerospace/ maritime finishing | 181 | Hardness, TiN films | 62 | Polythiophene coatings | 34 |
| Conference report – Eurocorr 2008 | 289 | High resolution scanning electron microscopy | 19 | Porous anodic films | 51, 109 |
| Conference report – IONMET/ PROSURF | 179 | Hothersall Memorial Award | 19 | Potentiodynamic anodic polarisation studies, Zn-Ni alloy deposition | 122 |
| Conference report – PCB plating technology | 293 | Lecture | | Potentiodynamic polarisation studies, Ni, acetate bath | 172 |
| Conference report – pulse plating | 82, 249 | Hothersall, A. W., biography | 248 | Potentiodynamic polarisation studies, Zn alloy deposition | 157 |
| Conference report – UK Corrosion 2007 | 6 | | | Potentiodynamic scanning | 55 |
| Conversion coatings, molybdates, Zn alloy surfaces, review | 251 | | | President's address | 80 |
| Copper electrodeposition | 41 | | | President's address, response | 241, 242 |
| Copper electrodeposition, nanoparticles, sulphate bath | 267 | | | Pulse electrodeposition, transient curve, modelling | 337 |
| | | | | Pulse electroforming, nanocrystalline Ni-Mn alloys, high frequency | 98 |
| | | | | Pulse plating | 82, 83, 87, 92, 98, 103, 249, 261, 275, 301, 337 |
| | | | | Pulse plating, mass transfer, diffusion layer, limiting current | 87 |

| | | | | | |
|---|---|--|--|---|---|
| Pulse plating, meeting report, research, industrial developments, future trends | 249 | Scanning electron microscopy, surface microphotography | 153 | Transmission electron microscopy | 55, 267 |
| Pulse plating, Ni-Co-Cu multilayers, citrate bath, giant magnetoresistance | 260 | Scanning tunnelling microscopy | 220 | Tribology, sliding wear, Co-W alloy electrodeposits, current density | 301 |
| Pulse plating, Ni-W alloys, citrate ammonia baths | 92 | Second harmonic generation spectroscopy | 267 | Ultrasonic agitation | 293 |
| Pulse plating, symposium report | 82 | Silanisation, bilayer, Al alloy, corrosion resistance, bond durability | 55 | Ultrasonic cleaning | 293, 332 |
| Pulse plating, zinc alloys, composition, properties | 103 | Silicon | 19 | Ultrasonic cleaning, frequency, cavitation, alkaline media | 332 |
| Pulse reverse current pigmentation, anodic films | 109 | Silver electrodeposition, brighteners, levellers | 275 | Water contact angle measurement, magneto-electropolished surface | 280 |
| Pulse reverse plating | 109, 115 | Silver electroless/immersion deposition, ionic liquid | 196 | Wear | 136, 301 |
| REACH legislation | 292 | Silver, electrolytic recovery, cyanide plating bath | 66 | X-ray diffraction | 62, 66, 92, 103, 122, 141, 153, 157, 162, 227, 301, 326 |
| Review, conducting polymer coatings, electrochemical technology | 34 | Solar cell | 19 | X-ray photoelectron spectroscopy | 141, 251, 308, 326 |
| Review, ionic liquid electro-finishing, eutectic based baths | 196 | Solar devices, nanoemitter | 19 | Yttria doped zirconia coatings, sol dip process | 162 |
| Review, molybdate conversion coatings, Zn surfaces | 251 | Spectrocolorimetry, pigmented anodic films | 109 | Zinc alloy electrodeposition, ionic liquid | 196 |
| Review, pulse plating, materials, power supplies, experimental design | 83 | Steady state current-potential studies | 275 | Zinc alloy electrodeposition, Zn-Fe, Zn-Fe-Ni | 157 |
| Review, solar devices, (photo) electrochemically prepared nanostructured Si surfaces, metal electrodeposition | 19 | Sulphuric acid anodising, boric acid modifier | 51 | Zinc alloy plating | 10, 103, 122, 141, 153, 156, 157, 196, 211 |
| Room temperature photoluminescence, TiN films | 62 | Surface morphology | 92, 109, 115, 141, 153, 157, 167, 211, 227, 234, 267, 308, 315 | Zinc electrodeposition, ionic liquid | 196 |
| Rotating disc electrode studies | 315 | Surface roughness | 301 | Zinc-cobalt alloy electrodeposition, corrosion resistance | 141 |
| Rotating disc electrode | 115, 148 | Surface topography, TiN films | 62 | Zinc-cobalt alloy pulse plating, composition, morphology | 103 |
| Salt spray testing | 141, 251 | Synchrotron radiation photoelectron spectroscopy | 19 | Zinc-iron alloy pulse plating, composition, morphology | 103 |
| Scanning electron microscopy | 62, 92, 109, 122, 157, 167, 205, 211, 227, 234, 267, 280, 315 | Tantalum electrodeposition, ionic liquid [Py _{1,4}][TFSA]/TaF ₅ | 220 | Zinc-manganese alloy electrodeposition, eutectic based ionic liquid, choline chloride/urea bath | 211 |
| Scanning electron microscopy, electron probe microanalysis | 103 | Technology road map, surface finishing | 189 | Zinc-manganese alloy plating, sulphate-citrate bath | 153 |
| Scanning electron microscopy, energy dispersive system | 162, 280 | Thermal treatment, yttria doped ZrO ₂ sol dip coating | 162 | Zinc-nickel alloy plating, alkaline zincate bath | 122 |
| Scanning electron microscopy, field emission gun | 51 | Throwing power | 172 | Zinc-nickel alloy pulse plating, composition, morphology | 10 |
| Scanning electron microscopy, high resolution field emission | 220 | Tin electrodeposition, sulphate/methane sulphonate bath | 148 | | |
| Scanning electron microscopy, high resolution | 19 | TiN films, materials properties | 62 | | |
| | | Tin, pulse deposition | 115 | | |
| | | Tin-copper alloy electrodeposition, methanesulphonic acid bath, surfactant | 315 | | |
| | | Titanium nitride thin films | 62 | | |
